

Title Goes Here

Erik Arthur Nelson
March 21, 2015

The Robotics Institute
School of Computer Science
Carnegie Mellon University
Pittsburgh, Pennsylvania

Thesis Committee:

Nathan Michael, *Chair*
Two
Three

*Submitted in partial fulfillment of the requirements
for the degree of Master of Science in Robotics.*

Abstract

Contents

1	Introduction	1
1.1	Thesis Problem	1
1.2	Summary of Approach	1
1.2.1	Thesis Statement	1
1.2.2	Metrics	1
1.3	Thesis Outline	1
2	Foundations	2
2.1	Occupancy Grid Mapping	2
2.2	Information Theory	2
2.2.1	Entropies, Divergences, and Mutual Information	2
2.2.2	Rényi’s α -entropy	2
2.2.3	Cauchy-Schwarz Quadratic Mutual Information	2
2.3	Active Perception	2
2.4	Receding Horizon Planning	2
2.5	Summary of Foundations	2
3	Environment Model Compression	3
3.1	The Principle of Relevant Information	3
3.2	Framing Occupancy Grid Compression as an Optimization	3
3.3	Solving the Optimization	3
3.4	Occupancy Grid Pyramids	3
3.5	Results	3
3.6	Chapter Summary	3
4	Balancing Map Compression with Sensing Accuracy	4
4.1	The Information Bottleneck Method	4
4.2	Optimizing Map Resolution for Sensing	4
4.3	Results	4
4.4	Chapter Summary	4

5	Compressed Maps for Active Perception	5
5.1	Adapting the Environment Model Online	5
5.2	Adapting Vehicle Dynamics to the Environment Model	5
5.3	Results	5
5.4	Chapter Summary	5
6	Summary, Contributions, and Future Work	6
6.1	Thesis Summary	6
6.2	Contributions	6
6.3	Future Work	6
6.4	Conclusions	6

Chapter 1

Introduction

1.1 Thesis Problem

1.2 Summary of Approach

1.2.1 Thesis Statement

1.2.2 Metrics

1.3 Thesis Outline

Chapter 2

Foundations

2.1 Occupancy Grid Mapping

2.2 Information Theory

2.2.1 Entropies, Divergences, and Mutual Information

2.2.2 Rényi's α -entropy

2.2.3 Cauchy-Schwarz Quadratic Mutual Information

2.3 Active Perception

2.4 Receding Horizon Planning

2.5 Summary of Foundations

Chapter 3

Environment Model Compression

3.1 The Principle of Relevant Information

3.2 Framing Occupancy Grid Compression as an Optimization

3.3 Solving the Optimization

3.4 Occupancy Grid Pyramids

3.5 Results

3.6 Chapter Summary

Chapter 4

Balancing Map Compression with Sensing Accuracy

4.1 The Information Bottleneck Method

4.2 Optimizing Map Resolution for Sensing

4.3 Results

4.4 Chapter Summary

Chapter 5

Compressed Maps for Active Perception

5.1 Adapting the Environment Model Online

5.2 Adapting Vehicle Dynamics to the Environment Model

5.3 Results

5.4 Chapter Summary

Chapter 6

Summary, Contributions, and Future Work

6.1 Thesis Summary

6.2 Contributions

6.3 Future Work

6.4 Conclusions

Bibliography
